CONTENTS

Volume VIII, Issue Nos. 1–6

International Journal of
QUANTUM CHEMISTRY

Issue No. 1, January

J. P. Daudey, P. Claverie, and J. P. Malrieu: Perturbative *ab initio* Calculations of Intermolecular Energies. I. Method 1

J. P. Daudey, J. P. Malrieu, and O. Rojas: Perturbative *ab initio* Calculations of Intermolecular Energies. II. The He · · · He Problem . . . 17

J. P. Daudey: Perturbative *ab initio* Calculations of Intermolecular Energies. III. The Water Dimer 29

M. M. Mestechkin and G. E. Whyman: Matrix Formulation of the Generalized Hartree-Fock Methods 45

S. R. Langhoff and E. R. Davidson: Configuration Interaction Calculations on the Nitrogen Molecule 61

A. Damommia and M. Synek: Accurate Analytical Self-Consistent Field Wave Functions for Tm^{2+} and Tm^{3+} 73

S. C. Mathur and J. Singh: More on Molecular Electronic Structure of Metal Phthalocyanines 79

E. R. Davidson: Matrix Elements for Spin-Adapted Configurations . . 83

D. Zeroka: Variation of the Polarizability of the Hydrogen Molecule Ion and the Hydrogen Molecule with Internuclear Separation 91

A. Gupta, A. K. Bhattacharya, and P. K. Mukherjee: Coupled Hartree-Fock Calculation of Static Dipole Polarizabilities and Shielding Factors of Open Shell Systems 97

A. I. Dement'ev, N. F. Stepanov, and S. S. Yarovoi: Convergence Problems in the Solution of SCF Equations 107

M. K. Ali and W. J. Meath: Floating One-Center Perturbation Treatments for H_2^+-like Molecules Based on Screened Hydrogen Atom or Molecular Puff Unperturbed Problems 119

D. P. Chong, W. R. Scott, C. P. Yue, P. S. C. Wang, M. L. Benston, and W. E. Palke: Application of the Distinguishable Electron Method . . . 137

Information for Contributors 151

Issue No. 2, March

L. L. Boyle and C. E. Schäffer: Alternative Equivalent Icosahedral Irreducible Tensors 153

E. M. Ledovskaya and M. I. Petrashen: Symmetry in the Heitler-London Method. I. The Connection of the Molecular Point Group with Its Electron Permutation Group in the Heitler-London Method 163

E. M. Ledovskaya and M. I. Petrashen: Symmetry in the Heitler-London Method. II. The Determination of the Allowed Molecular Multiplets . 171

P. Th. van Duijnen: Molecular Integrals Over Generalized Gaussian Basis Sets 179

C. Leibovici: Structure de l'Ion Fluoronium FH_2^+ et Chemin de la Protonation du Fluorure d'Hydrogene 193

J. Delhalle: On the Need of Precision in the Calculation of the LCAO Density Matrix of Polymers 201

A. D. Bandrauk: Integral Transform Functions and Separable Potentials 209

D. J. Klein and A. A. Cantu: Symmetry Adaptation and the Relation Between the Spin-Free and Space-Spin Formulations of Electronic Structure 223

D. J. Klein: Comments on Kets Not Strongly Symmetry Adapted . . 235

D. Mukherjee: A Comparative Calculation on Excited State Energies of Some Conjugated Hydrocarbons 247

R. J. Boyd and J. Katriel: The Coulomb Hole in the 2^3S State of the Helium Isoelectronic Sequence 255

P. Coffey: Potential Energy Integrals in Semiempirical MO Methods . . 263

G. A. Gallup: Symmetries of n-Electron Wave Functions Under Various Spatial Groups 267

R. Moccia: Static and Dynamic First- and Second-Order Properties by Variational Wave Functions 293

Announcement 315

Information for Contributors 317

Issue No. 3, May

F. A. Corsaro, F. R. Solenberger, and H. F. Hameka: A Variational Perturbation Treatment of the Hydrogen Molecular Ion Using the Green Function Method on the United Atom 319
